Lectora Intermediate

Instructor-led Training Class

Class Overview

This class goes above and beyond the basic uses of Lectora, focusing primarily on the use of variables and conditional actions within a title. In this one-day instructor-led course, you'll use variables to track user interactivity, display both generic and user information, and conditionally branch within a title.

Value Boost: Includes a 30-minute consultation with the instructor after training to answer further questions or help with a project.

The topics covered in class can be tailored to the unique needs of your organization.
This is an official ELB Learning training class. Certificate provided for those who complete the class.

Outline

- Modifying the Project Structure
- Building the Help Page
- Modifying the Introduction Policy page
- Building the Home Page
- Building the Knowledge Check Collaboration Page
- Building the Knowledge Check Compromise Page
- Building the Knowledge Check Negotiation Page
- Modifying the Quiz
- Modifying the Congratulations, you passed Page
- Publishing to SCORM
- RCD Exercises

Core Concepts

– Media Library Organizer
– Pop-up window
– Grouping and ungrouping objects
– Keystroke actions
– Working with tests
– Audio events
– Library objects
– Using the variable manager
– Displaying a variable's value
– Modifying a variable's value
– Conditional actions

– Adding a status indicator
– Status indicator actions
– Tracking status as a condition
– Working with assignable units
– Publishing to SCORM/web-based
– Creating a responsive course
– Responsive design inheritance
– Triggers, actions, and conditions
– Use page layouts
– Additional functionality
– Responsive course design tutorial

Details and Materials

Training Day

Start: 10:00am ET
Break: 1 hour for lunch
End: 5:00pm ET

Format

Instructor-led online class

Location

Online classes are delivered via GoTo Webinar. In-person classes are subject to variation.

Materials

Class information and a registration link will be emailed to you one week before class.

- Class manual: step-by-step instructions, tips, and hints designed to reinforce live instruction and provide a resource for students who wish to review and reproduce class activities asynchronously
- Exercise storyboards: guides to building the class projects with references to resource documentation
- Digital assets: files such as audio, video, and images that are prepared in advance by the instructor for use in class projects

Prerequisites

Students must meet the following minimum requirements:
- Comfortable with creating a course structure, adding content to a title, creating buttons, and have an overall understanding of Lectora's book metaphor, inheritance, and modes (these concepts are covered in the Lectora Fundamentals training)
- Have a copy of Lectora (complimentary temporary access to Lectora provided upon request)
- Proficiency using a Web browser
- Basic Windows knowledge, including the ability to:
  - Launch applications using the Start menu
  - Use the taskbar to switch between Windows applications
  - Use Windows Explorer to navigate the file structure, change the view of file listings, move and copy files, and create new folders (or directories)
  - Copy and paste text
